Lead & Copper Resident Service Line Self-Assessment
Please Complete and Return to Sun Valley PSD's Office As Soon As Possible

EPA's new Lead and Copper Rule requires water systems to remove more lead service lines than the old rule. To meet the new requirements the water system must identify and have a record of all water lines in the system including the customer's private lines. The state of West Virginia has given the water system until October 16, 2024, to complete the inventory of all water lines. With your help, we hope to complete this requirement before the deadline.

The questionnaire below will help us identify and record said data.

1. Physical Address: _____
2. What year was your home built: _____
3. Were the water lines ever replaced: Yes / No If Yes, what year: _____
4. What type of water line is in the home:
Pex/Plastic ____ Copper ____ Grey Metal ____ Unknown ____

Note: If the pipe in your home is a grey metal we must determine if it is Galvanized Steel or Lead.

If it is grey metal please answer the questions below:

If you scratch it with a screwdriver and it's hard, check here _____

If you scratch it with a screwdriver and it's soft and shiny when scratched, check here _____

5. Was the Private Service Line (water line between the home and water meter) ever replaced: Yes / No
If yes, what year _____ and what type of pipe was used: Plastic ____ or Copper ____

Printed Name: _____ Phone #: _____

Account #: _____

Signature: _____ Date: _____

Office Use Only
